### V3D-Geolite NEW

- The V3D-Geolite leverages one of the most advanced imaging alignment systems available. The system creates a live, 3D model of the vehicle and tracks corrections as they happen. The V3D-Geolite dramatically reduces setup and adjustment times because it is:
  - Ergonomic: Measures at multiple lift heights.†
  - Adaptable: Works on non-level surfaces.
  - Easy-to-Use: Captures targets automatically.
  - Fast: Shows progress in real-time.
- At the end of the day, it always comes down to the money. By using the V3D-Geolite, alignment will quickly become your most profitable service. You will also be able to train all of your technicians to perform alignments. Performing more alignments at a lower cost – that boosts your bottom line!
- 2 Year Parts & Labour Warranty
